

HOLSTEIN SIRE DIRECTORY

Empower Your Future Herd With Superior Genetics

ELITE IMPORTED SIREs

BREEDING TRADEMARKS

The symbols below describe trademarks and features of all the bulls in this catalogue. Each bull gets the trademarks appointed, which are related to the bull. The trademarks symbolize the trademarks which the bull inherits, and therefore improve your herd.

Longevity Improver

PL is the measurement of the number of months a cow is expected to stay in the milking herd. Higher is more favourable.

Udder Improver

To achieve genetic progress for udder health, texture and resistance to mastitis.

Component Improver

This is the amount of fat & protein of a bull's daughters are expected to produce above contemporaries. The higher, the better.

High Scores for Health Traits

It shows the all health, fertility and calving traits parameters are in positive. The Positive number is better for all traits.

Calving Ease Improver

Measures the tendency of calves to be born more or less easily. Expressed as a percent of difficult births in first-calf heifers, the lower the value, the better.

Improvement In All Traits

All Rounder is a multi-trait index which shows bull is good / positive in all parameters includes production, fertility, Type, longevity and wellness traits.

Type Improver

Udders , Feet & Legs , Body Weight Composite . The higher number is better for all traits

Milk Improver

Predicted ability of sire to transmit genetics for milk production. The kgs of milk produced by a bull's daughters above contemporaries. The higher, the better.

Beta Casein A2A2

The bulls analyzed up to the moment with genotype Beta-Casein A2A2

Feet & Legs

Feet and legs improver in cattle to enhance the health, strength, and longevity of cattle's hooves and limbs. These are essential to prevent lameness, improve mobility, and ensure optimal productivity.

Fertility Improver

Combines several reproductive components into one overall index: ability to conceive as a heifer (HCR), ability to conceive as a lactating cow (CCR) and a cow's overall ability to start cycling again, show heat, conceive, and maintain a pregnancy (DPR).

Low Somatic Cell Scores

SCS provides an indicator of mastitis in a bull's daughters based on the direct measure of somatic cells in milk samples. Lower is better
